FORWARD LOOKING STATEMENTS

Certain statements contained in this annual information form constitute forward-looking statements. All statements other than statements of historical fact may be forward-looking statements. These statements relate to, but are not limited to, future events or future performance, our expectations regarding the Company's growth, results of operations, estimated future revenues, and requirements for additional capital, production costs, future demand for latex-based products, business prospects and opportunities and our ability to successfully commercialize our products. Forward-looking statements are often, but not always, identified by use of words such as "may", "will", "should", "could", "seek", "anticipate", "contemplate", "continue", "expect", "intend", "plan", "potential", "budget", "target", "believe", "estimate" and similar expressions. Such statements reflect our current views and beliefs with respect to future events, are subject to risks and uncertainties, and are based upon a number of estimates and assumptions that, while considered reasonable by us, are inherently subject to significant business, economic, competitive, political and social uncertainties and contingencies. Many factors could cause actual results, performance or achievements to be materially different from any future results, performance, or achievements that may be expressed or implied by such forward-looking statements.

We have made material assumptions regarding, among other things: that our intellectual property rights are adequately protected; our ability to obtain the materials necessary for the production of our products; our ability to convert prospects from the industrial trial phase into full commercial customers; our ability to market products successfully to our customers; that we will continue to possess unique intellectual property rights; changes in demand for and prices of our products or the materials required to produce those products; labour and material costs remaining consistent with our current expectations; the price and availability of substitute or competitive products; and that we do not and will not infringe third party intellectual property rights. Some of our assumptions are based upon internal estimates and analysis of current market conditions and trends, management plans and strategies, economic conditions and other factors and are necessarily subject to risks and uncertainties inherent in projecting future conditions and results.

Some of the risks that could affect our future results and could cause those results to differ materially from those expressed in the forward-looking statements include, among other things: an inability to protect, defend, enforce or use our intellectual property and/or infringement of third-party intellectual property; dependence on certain customers and changes in customer demand; the availability and price of natural feedstocks used in the production of our products; the inability to effectively expand our production facilities; variations in our financial results; increase in industry competition; decrease in the price of substitute products; the risk of volatility in global financial conditions, as well as significant decline in general economic conditions; our ability to effectively commercially market and sell our products; our ability to protect our know-how and trade secrets; Company growth and the impact of significant operating and capital cost increases; changes in the current political and regulatory environment in which we operate; the inability to retain key personnel; changes to regulatory requirements, both regionally and internationally, governing development, production, exports, taxes, labour standards, waste disposal, and use, environmental protection, project safety and other matters; enforcement of intellectual property rights; a significant decrease in the market price of petroleum; a shortage of supplies, equipment and parts; the inability to secure additional government grants; a deterioration in our cash balances or liquidity; the inability to obtain equity or debt financing; the ability to acquire intellectual property; the risk of litigation; changes in government regulations and policies relating to our business; losses from hedging activities and changes in

hedging strategy; insufficient insurance coverage; the impact of issuance of additional equity securities on the trading price of the Common Shares (as defined herein); the impact of ethical, legal and social concerns relating to genetically modified organisms and the food versus fuel debate; the risk of business interruptions; the impact of changes in interest rates; the impact of changes in foreign currency exchange; and credit risk, as well as the factors identified in the "Risk Factors" section of this annual information form. Such factors are not intended to represent a complete list of the factors that could affect us. In addition to the risk factors identified in the Company's Annual Information Form, as of the date of this Press Release, the Company has identified additional risks associated with the COVID-19 global pandemic which are described below. These factors should be considered carefully, and readers should not place undue reliance on forward-looking information.

Beginning in December 2019, a new strain of the coronavirus (COVID-19) has spread rapidly through the world. During the three and nine months ended September 30, 2020, COVID-19 has caused both the global demand for paper products to decrease and a decrease in the pricing of petroleum-related products with which the Company's products compete with. This has resulted in reduced sales volume, lower pricing and reduced gross profit for the Company. COVID-19 has also reduced the Company's ability to effectively market and trial its products with customers where on-site collaboration is preferred. During the three and nine months ended September 30, 2020, the Company also applied for and received government assistance under the Canadian Emergency Wage Subsidy (CEWS) program. No other COVID-19 related risks identified below have materialized during the period and there has been no other impact on operating results. For the remainder of 2020, COVID-19 will likely continue to have negative material impacts on the global economy which present significant additional risk factors. For the Company, this outbreak might materially impact the Company's ability to manufacture, source (including the delivery of raw materials to its facilities) or distribute its products both domestically and internationally; reduce our ability to effectively market and sell our products; reduce demand for our products; cause a significant decrease in the market price for petroleum related feedstocks which our products are an alternative, and cause increased credit risk. Any of these additional risks factors could have a significant negative impact on the Company's financial results in 2020 and beyond. Given the dynamic nature of this outbreak, the extent to which the COVID-19 virus impacts the Company's results will depend on future developments, which remain highly uncertain and cannot be accurately predicted at this time.

Should one or more of these risks or uncertainties materialize, or should assumptions underlying those forward-looking statements prove incorrect, actual results may vary materially from those anticipated in such forward-looking statements.

Although the forward-looking statements contained herein are based upon what we believe to be reasonable assumptions, there can be no assurance that such forward-looking information will prove to be accurate and we cannot assure that actual results will be consistent with these forward-looking statements. Accordingly, readers should not place undue reliance on forward-looking statements. The information contained in this document, including the information provided under the heading "Risk Factors", identifies additional factors that could affect the Company's operating results and performance.

Forward-looking information contained herein is made as of the date of this annual information form and we disclaim any obligation to update any forward-looking information, whether as a result of new information, future events or results, except as may be required by applicable securities laws. Accordingly, readers should not place undue reliance on forward-looking information.

BE.YOND PARTICLE BOARD

Our newly launched **BE.YOND products** are the most **environmentally friendly** particle boards available and are produced using **next generation bio-based** adhesives that provide the highest indoor air quality.

BE.YOND does not compromise on quality, but more importantly not on health: a genuine benefit for people and nature.

- ▀ *Minimum 98% natural materials*
- ▀ *Same levels of emissions as a tree*
- ▀ *FSC®- or PEFC-certified on request*
- ▀ *Exceeds CARB Phase II standards*
- ▀ *Improves your LEED point of level*

BE.YOND is available in our full and extensive range of decorative designs & textures on demand.
swisskrono.com/oneworld

Our healthy particle board is available in thicknesses of 8/16/18/19/25 mm and sizes 2800x2070 mm and 5600x2070 mm.
